Made in Spain

TEACHING AIDS

TEACHING AIDS
Manufacturer & Publisher

LADO is a **leading global manufacturer of high quality teaching tools**. Our products are sold in more than 15 countries serving teachers and learners from Pre-Kinder, Kinder and Primary School.

All LADO teaching aids are designed and manufactured in Europe, Spain **CE** under the standard EN-71.

Unique LADO features:

- **High quality, safe** and durable teaching tools.
- Teaching tools with a **broader educational purpose**.
More exercises and real application.
- Complete **teacher's user guide** (expositions, illustrations and exercises for teachers and learners.)

LADO team

Modulán

PSYCHOMOTOR SKILL

GEOSHAPES

Construction toys in education

Construction toys are very important in the early year education to psychomotor and intellectual development.

LADO construction teaching tools help to improve **creativity and fantasy**. These materials support to develop spatial awareness in children, teaching kids about volume, space, and size, through the use of visual and tactile feedback.

As the child matures, the difficulty grade/level of the teaching tools must to increase, to require them more precision and attention.

The main objective is to develop their whole body coordination between their hands, fingers and their eyes.

Develop role play activities. For example Children can pretend to be architects or engineers.

H MODULES

**BIG pieces for
small HANDS**

EDUCATIONAL PURPOSE:

- Improve control and coordination of both hands.
- Develop imagination and creativity.
- Develop equilibrium and motor skills.
- Help to learn and distinguish between colors.

- ◆ Vacuum sealing increases their strength without increases their weight.
- ◆ Proportional sizes to allow multiples fitting positions.
- ◆ Special design for better assembly.
- ◆ Smooth to the touch and bright colors.
- ◆ Safety and washable.

Modulán

It only breaks if an Elephant steps on it.

Ref. 101

Creativity.

Modulán is continuing to improve and to provide "Creativity and Fantasy".

With it, mobile and stationary assemblies can be made, giving life to imaginary scenes with animals, tower, trains, walls, farms, etc.

Modulan is useful for teaching kids about volume, space and size through the use of visual and tactile feedback.

Helps to develop manual dexterity, eye hand coordination, and creativity.

Size of each piece:
24 x 18 cm

Ref. 105

Modules nº2

Included models
guide

Vacuum sealing increases their strength without increasing their weight.

They don't break when you step on them.

They are lightweight, and safe.

Modulan floats and can be use on water.

Very easy to wash.

Smooth and with no sharp edges.

EDUCATION Support

CHAINS

Ref. 111

EDUCATIONAL PURPOSE:

- Develops creativity and imagination.
- Eye hand coordination.
- Improves finger strength and precision.
- Improves pinching motion (picking up objects between the thumb and index finger)

The chains have 2 configurations: **Simple** (with 2 connection points) and **Double** (with 4 connection points). Due to this 2 configurations, mobile and stationery assemblies can be made.

The chains train small finger muscles. Work with them requires neatness and precision.

Helps to familiarize with pre-writing techniques.

Simple and double chains.

Assembly system can be mobile and stationery.

In drawing

In volume

Helps with comprehension with concepts such as:

Large - Short / Tall - Short
Colors series / More - Less
Addition - Subtraction, etc.

EDUCATION Support

LADO BRICKS

Ref. 120

LADO Bricks are simple pieces that are very useful in early childhood education.

During their early years the child can use them to learn how to manage their own body, coordinate use of both hands, and relate harmoniously hands and eyes (to improve eye-hand coordination).

Also useful for introducing spatial concepts (in front of, behind, above, below, etc.) and mathematical concepts (more than, less than, few, etc)

I want to be...

EDUCATIONAL PURPOSE:

- Encourage manual and creative activities.
- Exercise fine motor skills.
- Introduce children to logic and mathematics activities.
- Encourage role play activities.

LADO Bricks are equal in size and shape to normal construction bricks.

EDUCATION Support

**CREATIVITY AND LEARNING CAN NOT BE CREATED,
BUT CAN BE INDUCED THROUGH THE USE OF
THIS MATERIALS .**

LADO has designed a new line of mathematics teaching tools to improve logical thinking, through the observation and hands on nature of these materials.

Using these material LADO stimulates the child's ability to reason, classify, create patrons, etc.

Learning to *COUNT*

Ref. 209

Content:

- 20 pieces in 2 colors which connect to each other
- 55 Balls 25 mm Ø in 10 colors.
- 10 Sticks in 10 different sizes..

Self-correcting system

Assembly system

This counting set is a method with a self-correcting system in which children will easily learn to count.

Object manipulation is the basis of this method, and the child will create the numbers as union of tangible items.

This set consists of pieces with numbers, balls and sticks of different sizes, to create a unique number scale.

The color chosen for each ball is the same as used in LADO RODS (Numbers in colors, another method to learn how to calculate. Pag. 14 of this catalogue).

LADO used the same colors to make easier the way to learn.

Ref. 209

Learning to COUNT

+ 3 years

Learning to **CALCULATE**

Ref. 210

Content:

108 pieces which connect to one another
36 operator symbols.
60 pcs with numbers. (from 0 to 9)
12 Fractions

Assembly system

The presentation of the arithmetic operations in horizontally orientation improves mental math skills.

Introduction to basic operations:

Introduction to Fractions:

Balance operations:

Sum characteristics/ attributes:

EDUCATIONAL PURPOSE:

This hands on method introduces children to:

- Mental Math and number writing.
- Knowledge and use of arithmetical signs (operator symbols).
- Development of mental math strategies.
- Application of the commutative, associative and distributive properties of mathematics.
- The introduction and practice of basic fractions.

The arithmetic symbols, along with the numbers printed on the cards (which connect to one another), allow the young learners to "build" simple operations, and allow older children to create more complex ones.

SCALES & WEIGHTS

Ref. 212

Transparent and graduated plates, with 45 weights.

With LADO weights and LADO scales children can experiment with equivalency and equality.

EDUCATIONAL PURPOSE:

- Practice with different materials, studying their weight and volume.
- Carry out activities regarding weighing by comparison.
- Introduction to calculus.
- Introduction of basic concepts such as: "comparative weights" "more than, less than..."

Leveling handle to level the scale.

Ref. 214

Opaque and graduated plates .

Opaque plates allow for the use of all types of materials (sand, stones, etc).

The pointer must to line up. It indicates that both sides of the scale weigh the same.

Ref. 213 Container with 90 weights
with handle and lid

The grams indicated on each LADO weight are the actual mass of the item. In this way weights can be created to suit the desire weight.

EDUCATION Support

LADO - RODS

EDUCATIONAL PURPOSE:

- Presents Numbers in colors.
- Teaches children the relationship between Color- Size-Number (through the use of an Intuitive Method)
- Prioritizes visual feedback over auditory feedback.
- Provides a structured medium by which children can comprehend the elementary arithmetic (self-taught).
- Enhances instruction and provides engaging learning experiences to develop logic, mathematical skills and cognitive thinking.

Four qualities that make LADO Rods DIFFERENT:

Segmentation (Fractionated rods)

Help in composition and breakdown of numbers.

Symbolize the successive aggregation of units.

Numeration (Graded rods)

Self-correcting method.
Number printed on one side of each rod to aid in comprehension.

Long-Lasting

Most rods are made of wood. Unlike wooden rods, the paint and shape of LADO rods stay consistent because of their plastic construction.

Safety.

Due to your children will be safe although they suck LADO rods.

Adapted to Digital Technology.

Digital LADO Rod Method is the next generation tool in active teaching for young learners. The effectiveness of this tool is due to the combined of Physical materials and Digital LADO Rod Method. See more in Page 65.

Logic Blocks

¿What are the Logic Blocks?

Logic Blocks are 3 dimensional shapes with different colors, sizes, textures and wighths. **LADO has improved conventional Logic Blocks.**

LADO Logic Blocks have the highest amount of attributes on the market. Up to 3 times more than other including, an extra shape (Hexagon), an extra size (Medium), an extra color (Green) and two extra textures.

LADO Logic Blocks let you increase the difficulty of activities for use in high levels or Primary School.

LADO Logic Block exercises can be divided in "Basic" and "Advanced".

- **BASIC Levels:** To Define and recognise the different Block attributes: COLORS, SHAPES, SIZES, THICKNESSES (WIDTH) AND TEXTURES.
- **ADVANCED Levels:** Correspond to the development of the logical games. To teach children how to reasoning.

Attributes LADO Logic Blocks

SIZES 3		SHAPES 5					TICKNESSES 2
	Big						 15 THIN Blocks
	Medium						
	Small						
		Square	Triangle	Rectangle	Circle	Hexagon	
	Big						 15 THICK Blocks
	Medium						
	Small						

Different Blocks by: the **size**, the **shape** and the **thicknesses** = 30

4 COLORS:					= 120 Blocks
And 2 TEXTURES in each Block:	SOFT: 	ROUGH: 			= 240 Atribut

OBSERVE AND RECOGNISE:

We analyze each block separately.
We examine the qualities and attributes of each block. We make pairs.

ORDER BY GRIDS:

We make different types of grids.
We order by rows and columns.

ATTRIBUTES IDENTIFICATION:

We get familiar with the attribute cards.
With four attributes we identify a specific block. With fewer attributes we identify more blocks.

DOUBLE-ENTRY BOARDS:

We place blocks into boards in the places indicated by the attribute cards.

SERIES:

We make rows of blocks where each block is related with the previous ones by one or more attributes.

NEGATION GAMES:

We study a block and we understand what attributes does not possess. We associate the new NO card with the other attribute cards.

CHANGE OF ATTRIBUTES:

Games that propose change of attributes, represented by arrows. We use different rules for these changes.

Logic Blocks

Ref. 222 Logic Blocks.
In Case with 60 blocks and guide.

Bigger blocks

Ref. 223 Logic Blocks
Can with 60 blocks and guide.

Ref. 221 Logic Blocks
Can with 80 blocks and Attribute cards.

Ref. 225 Logic Blocks.
In case with 90 blocks and guide.

3 sizes
3 colors

Ref. 229 Attributes of logic
Blocks (cards) and guide.

The success is based on the use combined with the Digital Method (See more in Pag. 40)

The greater combination of LADO logic Blocks in the market because we give 120 different blocks:

- 4 colors:** red, blue, yellow and green.
- 3 sizes:** big, medium, small
- 2 thicknesses/width:** Thick and thin.
- 2 textures:** Soft y Rough.
- 5 shapes:** circle, square, triangle, rectangle y hexagon.

Ref. 226 Logic Blocks. Bucket with 120 pcs.

The meters “m - m² - m³”

Measurement Set

Hands on method to understand clearly the main measurement units:
LENGTH, AREA and VOLUME in the International System of Units (SI)

Content:

- 1 Graduated tube of 1 m
- 4 Tubes and connectors to create the m²
- 12 Tubes and connectors to create the m³
- 30 Pins to fix the m³ (can not be disassembled)
- 1 Graduate box with 10 pcs of 1 cm³
- 1 Graduate box with 10 pcs of 10 x 1 x 1 cm
- 1 10 sheets of 1 mm of thicknesses
- 1 A separable dm³.
- 1 User guide.

Length measurement units.

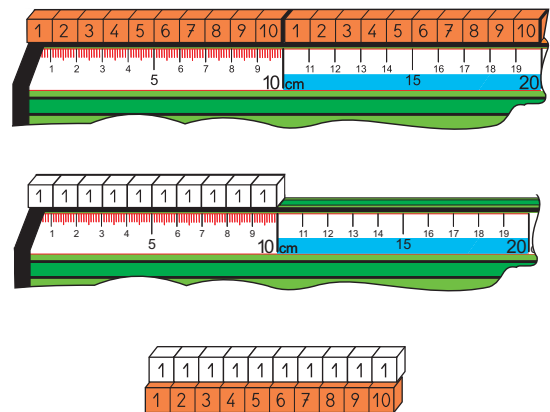

Area measurement units.

Volume measurement units.

Some examples of how to use to demonstrations:

EDUCATION Support

FETTÉN ABACUS

1. **Different colors indicate** different place values to make the operations easier to understand.

3. Includes a **marker** to write on the abacus whatever value may be needed.

4. **Big Size of LADO's FETTÉN Abacus.** It is perfect to use with a group of children.

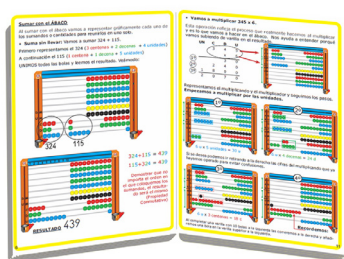

Ref. 205

EDUCATIONAL PURPOSE:

Manipulative support to initiate children:

- Into the numeric system.
- Into the calculation procedures made by reasoning instead of mechanically.
- Into the completion of simple arithmetical operations.
- Into the preparation and practice of mental calculation.

2. FETTÉN Abacus is designed to make easy and ergonomic to handle for children..

5. Includes **USER GUIDE** with examples to explain simplest arithmetic activities as:

Add, Subtract, Multiply and Divide with your abacus.

CART OF MATH

Set of material to introduce children to calculate and numbers.

Helps to develop logical mathematical experiences in class.

This set is very useful to have everything together in class or to move to other places.

Content:

- 1 **Abacus FETTÉN** to introduce the basic arithmetic concepts.
 - 1 **Rods** (305 pcs) to introduce the numbers in color
 - 1 **Scale and the 45 weights.**
 - 1 Learning to Count. Ref. 209 (pag. 11).
 - 1 Learning to Calculate. Ref. 210 (pag. 12).
 - 1 Logic Blocks, Container with 80 logic blocks and attributes cards. Ref. 221 (see pag. 17).
- In a FETTÉN cart/Trolley with wheels.

Reading and writing

Written language is a human invention. Because of this it must to be taught. But spoken language or body language are learnt naturally.

Reading and writing are complex activities that are very important and fundamental for leading a normal life and succeeding in higher learning.

LADO provides teaching tools to assist in this task of learning.

CART OF READING AND WRITING

Set of material to develop reading and writing properly.

This set is very useful to have everything together in class or to move to other places.

Content:

- 6 Books. Pío-pío Method of Writing.
- 2 Books. Pío-pío Method of Reading.
- 1 Large Alphabet. In case.
- 1 Learning to Read. Print Script
- 1 Learning to Read. Cursive letter.
- 1 Pencil Grip. Container with 30 pcs.
- In a FETTEN cart/Trolley with wheels.

Ayudando a EDUCAR

Learning to **READ**

PRINT SCRIPT

Ref. 301

Content:

18 drawing cards
26 Capital Letter cards .
82 Lower case Letter cards
(All long lasting cards).

This reading set is a method with a self-correcting system in which children will easily learn to read.

Object manipulation is the basis of this method, and the child will create names and words as union of letters.

This set consists of assembled pieces with vowels, consonants, and drawings.

Self-correcting system helps to not misunderstand letters.

Self-correcting system said if the position card is correct.

EDUCATIONAL PURPOSE:

- Helps the child to know the Alphabet.
- Facilitates understanding of vowels and consonants and their order.
- Assigns the alphabetic symbol with each sound.
- Differentiates the capital letter and the lowercase letter.
- Composes the children's name with capital letters.

Assembly system

Can be assembly horizontally and vertically

Learning to **READ**

CURSIVE LETTER

EDUCATIONAL PURPOSE:

- Helps the child to know another way to represent the same alphabet
- Differentiates vowels and consonants (in capital letters, print script and cursive letter.)
- Assigns each alphabetic symbol with one sound.
- Finds the letters that compose one word.
- Remarks the letters stroke. (All letters of one word are connected).

Ref. 302

Content:

18 drawing cards.
18 cards with Spanish words.
108 cards with cursive letters.
(All long lasting cards).

18 drawing cards.

18 cards with Spanish words.

With this type of script, children learn a rhythmical and fast writing. The pieces have an exceptionally resistant link system, that allows to create words fast and easily.

Assembly system

Self-correcting system

In this set there are pieces with attractive drawings of common topics, to carry out activities of word-drawing associations. (Didactic method of self-dictation). Furthermore this set included other pieces with the names of the drawings in Spanish to learn a new language.

Alphabet & Numbers

Ref. 305

Content:

29 Plates with LETTERS
10 Plates with NUMBERS.

LARGE PLATES with different colors

Number plate color: Orange

Vowels plate color: Blue

Consonants plate color: Green

EDUCATIONAL PURPOSE:

- Introduce letters and numbers to children..
- Stimulate the visual perception thanks to big and clear lines.
- Help to know and differentiate letter and numbers.
- Help to show and use with a lot of children at the same time.
- Find and recognise differences and similarities on letter and number shapes.
- Help to memorize the alphabet and its order.

Supplementary LADO material: Bricks. Poles, Unions
See page 32

Manual Dexterity

MANUAL DEXTERITY along with the HAND-EYE COORDINATION are the base of all the activities focused on the stimulation of FINE MOTOR SKILLS.

MANUAL DEXTERITY:

is improved by

- Picking up objects between the thumb and the other fingers.
- Dropping
- Pressing
- Cutting
- Holding
- Squeezing
- Touching
- Moving...

EYE-HAND COORDINATION

is improved by

- Drawing/Prewriting activities
- Beads stringing
- Bilateral Integration
- Dress up dolls
- Right and Left awareness
- Coordination exercises of the upper members.(fingers, hands, arms)

Manual dexterity activities enhance **fine motor skills, sensory, cognitive, and creative development.**

FINE MOTOR SKILLS

improve...

- Fine motor precision.
- Hand and finger strength.
- Coordination of small muscle movements.

SENSORY DEVELOPMENT

improve...

- Concentration skills.
- Observation skills.
- Visual memory and perception.
- Tactile perception
- Rules of behavior.

COGNITIVE DEVELOPMENT

improve...

- Proportional reasoning.
- Introduction of number, quantity and measure concepts.
- Logical reasoning.
- Spatial awareness.

CREATIVITY DEVELOPMENT

improve...

- Aesthetic and artistic growth.
- Color learning.
- Powerful imagination.
- Self-Esteem improvement.

Adapta-LADO

TWO in ONE

Ergonomic
design

"Is better to teach
ones that to keep
correcting"

Prevent bad posture

Prevent Fingers from Sliding

three sides..

for three fingers

Two positions
=
Two solutions

EDUCATIONAL PURPOSE:

- The purpose of Adapta-LADO is to teach children how to properly grip pencils, pens and punchers.
- Prevent incorrect postures because is better to teach ones that to keep correcting.
- It is highly recommended for young learners due to its size and design. Also perfect for special education.
- Two positions for two solutions
- Our Design helps grip the pencil naturally: thumb, index and middle finger in their proper positions.

Manual Dexterity SET

Ref. 467

They must figure out is in each can ny touching them (Blind fold)

This set improves fine motor skills development during the early years of childhood (2-6 years). It is useful for the general education and the special needs learners.

The proper use of this material enhances instruction for the teacher and provides engaging learning experiences to develop fine motor skills and eye hand coordination for the child.

The high level of manual dexterity that humans exhibit can be attributed to the manner in which manual tasks are controlled by the nervous system.

Many test have indicated that physical experiences perceive by senses enhances learning.

Below is a list of senss in their importance for learning:

SIGHT	83%
HEARING	11%
TOUCH	3,5%
SMELL	1,5%
TASTE	1%

Teacher User guide

Content:

- 5 ROUND Plastic FRAMES for sewing and threading beads. In 4 colors.
- 1 10 plastic sorting dowels RODS. (3 to 34,5 cm.)
- 40 BIG and SMALL BEADS in 5 colors.
- 10 BALLS 25 mm Ø.
- 15 BALLS 20 mm Ø.
- 20 BALLS 16 mm Ø.
- 30 BALLS 10 mm Ø.
- 2 PERFORATE Plastic PLATES to sew and decorate.
- 24 BIG NEEDLES.
- 24 BUTTONS (with different number of holes: 1,2,3 and 4 holes.)
- 2 Rolls of BRAIDED LACE (2,8 mm Ø) in 5 colors.
- 2 Rolls of PLASTIC LACE 10 m.
- 1 RUBBER PLATE for punching activities. (15 x 20 cm.)
- 18 TEMPLATES for punching and decorating.
- 18 TEMPLATES for punching and cutting.
- 6 LARGE LADO PUNCHER "Stainless Brass Tip".
- 12 SMALL LADO PUNCHER "Stainless Brass Tip".
- 24 Simple and Double CHAINS in 5 colors.
- 14 Adapta-LADO. Grip for pencil, pen or puncher.
- 6 Plastic and Flexible CORD in different colors. (6,5 mm x 1 mm. Length: 1 m.)
- 23 Small containers for storing and classifying the material
- 1 Teacher User guide.

EDUCATIONAL PURPOSE:

- Stimulate creativity and imagination
- Right and Left awareness
- Improve the movement of the fingers.
- Sensory stimulation.
- Perform spatial organization exercises.
- Encouraging more focus and concentration.

It is possible the implementation of many exercises due to the large variety of shapes, sizes and colors of these sets. All the beads can thread on the laces, and the teacher can classify the beads depending on the grade of difficulty.

This material is not only useful with children, but also for rehabilitation exercises with adults or occupational therapy with old people.

EDUCATION Support

Hand - Eye Coordination Activities

Hand - Eye coordination activities are exercises that help the child use their hands properly to interact with the world around them in an exact manner.

The development of the grasping motion (picking up objects between the thumb and index finger) is related to fine motor skills and visual perception. This makes the locating of the objects possible and helps to move objects.

CART OF HAND-EYE COORDINATION

Set of material to develop Hand-eye coordination.

This set is very useful to have everything together in class or to move to other places.

Content:

- 25 Transparent plate.
- 2 Template set.
- 440 Multi Leg Pegs (4 & leg Pegs) PULPOS y PULPITOS in 5 colors.
- 1.505 Big Pegs in 5 colors.
- 1 GeoShapes

Ref. 493

GEOFORMAS

Ref. 456

Content:

- 2 Transparent Plates (26,4 x 20 cm); 2 containers with 300 small pegs in 5 colors and 2 Multi-Leg Pegs to join the plates.
- Elastic bands of different sizes.
- 1 Roll of plastic string and User Guide with models.

EDUCATIONAL PURPOSE:

- Stimulates creativity and imagination.
- Right and Left awareness.
- Develops of Perceptive abilities.
- Understands the 2D Shapes and 2D representations.
- Works with an individual and unique Geoboard, created by the child.

How does "Geoformas" works?

Img. 2

Ideal position for the construction of Geoboards. It allows the placement of more than one rubber band or string in the same peg.

Img. 1

Using Pegs like this, the rubber bands can be in the upper part or in the lower part of the peg. Increasing the difficulty of the exercises.

GEOFORMAS is a graphic method that allows to train visual communication on children.

Our purpose is the development of perceptive abilities (visual and tactile) knowing the perception implies more than watching. Perceptions means understanding. The aim is to teach to look, analyzing and expressing in a graphic way what we are thinking.

It consist of transparent plates in which color pegs are placed (Img 1 and 2).

Later over them elastic bands and strings are placed to mark out the area of the figures. Also Includes two multi-legs pegs used to join plates for a bigger working area.

PSYCHOMOTOR Education

Psychomotor education is an educational and psychological action that uses physical education to originate mental activity.

We can define psychomotor activity as “THE ART BY WHICH CHILDREN GET TO CONTROL THEIR BODY, COMBINING THEIR MIND AND THEIR MOVEMENT VISION”.

With this activity the movements and gestures of the child are trained, he is taught how to place himself in the space, how to move correctly and safely. His mind will be also trained, and as a result the child becomes more self-sure and more disciplined.

It is a comprehensive education in which the starting point is the corporal dimension of the human being. As movement is the foundation of all psychological evolution, the general objective that is pursued with psychomotor education is to cause a certain mental activity using action: “EDUCATION BY MOVEMENT”.

Movement is a key factor in the child's mental development. We can say that MOTOR ACTIVITY is the beginning of the development of intelligence, so PSYCHOMOTOR EDUCATION must be considered as a primary education, as a foundation of all school learning.

Objectives of “Psychomotor education”:

- To make the child **aware of their own body**
- The structuring of the child's **corporal scheme**
- **Equilibrium** control
- The development of **general dynamic coordination**
- Voluntary control of **respiration**
- Perception and **orientation in space and time**
- The establishment of **communication channels** with the environment.
- To normalize or improve the **behavior** in general.
- To make the **school learning** easier.
- To boost the **child's autonomy**.

POSTURES Activities

Ref. 624

Main objective of psychomotor education is the study of the corporal scheme.

Le Boulch defines it as "Global intuition or immediate knowledge of our own body, both when it's resting and moving, depending on the relationship between its parts and its relationship with the space and the objects that surround us".

EDUCATIONAL PURPOSE:

- Awareness of your own body and the dimensions.
- Right and Left awareness.
- Orientation in relation to self.

Content:

- 10 FootPrints (Left&Right).
- 10 HandPrints (Left&Right)
- 2 Orientation signals .
- 4 Plates of two shapes and two colors.
- 2 Cord Rolls of 3 m (8 mm ø).
- 1 User guide.

LADO STILTS

Road Safety Education

Ref. 905

DETAIL: Way to hang the sign over the pole Adaptor Ref. 610

Content:

- 25 Traffic Signs.
- 1 Support to hang the sign.
- 1 User Guide.

The Main Educational Purpose of this set is to allow the children to interact and play with the signs, so they can finally know, understand and get familiar with all the signs. This way the children will be aware, from very young, that respecting traffic signs favors their own safety and the rest of citizens.

With this set of materials, the objective is not to make the children memorize the meaning of each traffic sign or all the traffic code. The goal is to develop and instill CAUTION and RESPECTFUL attitudes that favor children's safety in their surroundings.

To achieve this goal, we can perform activities related to:

- The Pedestrian circulation rules.
- The attitude of the children when they act as a pedestrian or a driver.
- The simulation of everyday life situations in roads of villages and cities.
- The different kind of vehicles that the children can find on the street.
- The most typical positions of the traffic signs.

Digital®

Best Educative Software to use with LADO teaching Tools

LADO Digital Methods (Kindergarten and primary school)**Innovation leads to your class.**

The high level of learning that children can achieve can be attributed to the manner in which the instruction is adapted to their everyday lives.

Effective early learning taught digitally can not be achieved simple by using computers and software. A digital Method with concrete and adaptive objectives must be used.

Studies show that children who study using new technology are more curious, more motivated, more interested more focused more willing to learn and discover on their own.

Digital LADO Logic Block Method

Piaget posited that the “logical-mathematical experiences” presented through different games in the early years of development, may generate on interest in children that will create a real enthusiasm for mathematics.

First level: LADO - Logic Block with digital activities.

Ref. **2211-AD**

Basic level

Thousand of randomised learning exercises to help children understand the concepts (size, shape, color, width and texture) using Logic Blocks, and to teach them about the relationship between those attributes.

The subjects covered by the activities are:

- The 4 Colors - The 5 Shapes - 2 Sizes
- 2 Widths - 2 Textures.
- Observe and Recognise. Children will look at the blocks and determine their attributes.
- Attributes Identification.. Children will identify the attributes of blocks using attribute cards.
- Double Entry board.

Container with 80 Logic Blocks
+ Attribute cards
+ Software (Annual license of the basic level).

Second Level: Digital LADO - Logic Block Method

Ref. **3000-AD**

Advanced Level

The subjects covered by the activities in Advanced level are:

- All the contents of Basic level

+

- 3 Sizes.
- Order by Grips
- Patterns.
- Change of attributes.
- Negation Games.
- Blocks without some attribute.

Container with 120 Logic Blocks

Logic Blocks

We remind you...

¿What are the Logic Blocks?

Logic Blocks are 3 dimensional shapes with different colors, sizes, textures and wighths. **LADO has improved conventional Logic Blocks.**

LADO Logic Blocks have the highest amount of attributes on the market. Up to 3 times more than other including, an extra shape (Hexagon), an extra size (Medium), an extra color (Green) and two extra textures.

LADO Logic Blocks let you increase the difficulty of activities for use in high levels or Primary School.

LADO Logic Block exercises can divided in "Basic" and "Advanced".

- **BASIC Levels:** To Define and recognise the different Block attributes: COLORS, SHAPES, SIZES, THICKNESSES (WIDTH) AND TEXTURES.
- **ADVANCED Levels:** Correspond to the development of the logical games. To teach children how to reasoning.

Attributes LADO Logic Blocks

SIZES 3		SHAPES 5					TICKNESSES 2
	Big						 15 THIN Blocks
	Medium						
	Small						
		Square	Triangle	Rectangle	Circle	Hexagon	 15 THICK Blocks
	Big						
	Medium						
	Small						
Different Blocks by: the size , the shape and the thicknesses = 30							
4 COLORS:						= 120 Blocks	
And 2 TEXTURES in each Block:		SOFT: 	ROUGH: 	= 240 Atributtes			

OBSERVE AND RECOGNISE:

We analyze each block separately. We examine the qualities and attributes of each block. We make pairs.

ORDER BY GRIDS:

We make different types of grids. We order by rows and columns.

ATTRIBUTES IDENTIFICATION:

We get familiar with the attribute cards. With four attributes we identify a specific block. With fewer attributes we identify more blocks.

DOUBLE-ENTRY BOARDS:

We place blocks into boards in the places indicated by the attribute cards.

SERIES:

We make rows of blocks where each block is related with the previous ones by one or more attributes.

NEGATION GAMES:

We study a block and we understand what attributes does not possess. We associate the new NO card with the other attribute cards.

CHANGE OF ATTRIBUTES:

Games that propose change of attributes, represented by arrows. We use different rules for these changes.

LADO - RODS

EDUCATIONAL PURPOSE:

- Presents Numbers in colors.
- Teaches children the relationship between Color- Size-Number (through the use of an Intuitive Method)
- Prioritizes visual feedback over auditory feedback.
- Provides a structured medium by which children can comprehend the elementary arithmetic (self-taught).
- Enhances instruction and provides engaging learning experiences to develop logic, mathematical skills and cognitive thinking.

Four qualities that make **LADO** Rods **DIFFERENT**:

Segmentation (Fractionated rods)

Help in composition and breakdown of numbers.
Symbolize the successive aggregation of units.

Numeration (Graded rods)

Self-correcting method.
Number printed on one side of each rod to aid in comprehension.

Long-Lasting

Most rods are made of wood. Unlike wooden rods, the paint and shape of LADO rods stay consistent because of their plastic construction.

Safety.

Due to your children will be safe although they suck LADO rods.

Adapted to Digital Technology.

Digital LADO Rod Method is the next generation tool in active teaching for young learners. The effectiveness of this tool is due to the combined of Physical materials and Digital LADO Rod Method. See more in Page 65.

Digital LADO ROD Method

Studies show that children who study using new technology are more curious, more motivated, more interested more focused more willing to learn and discover on their own.

First level: LADO - Rods with digital activities.

Ref. **2191-AD**

Basic level

Educational Purpose:

- What the rods are.
- To understand the number composition and the relation between each number.
- To check with rods that the numbers are groups of units.
- To learn how to compose and break-down numbers.
- To discover the Dozen
- To play with equivalences
- To start with Addition and Subtraction.

Container with 52 rods

+

Software (Annual license of the basic level).

Second Level: Digital LADO - Rods Method

Ref. **2171-AD**

Advanced Level

Educational Purpose:

- To know the scale number and their real value.
- To make patterns of colors, sizes and numbers.
- To understand the meaning of Basic operations: Addition, Subtraction, Multiplication and Division.
- To calculate Areas with rods.
- To develop Logic arguments.
- Ability and wit games.
